Amendments to the Claims:

Please cancel claims 1 - 18 without prejudice.

Please add new Claims 19 and 20 as shown below.

This Listing of Claims will replace prior versions, and listings, of claims in the application.

Listing of Claims:

1 – 18 (canceled)

19. (new) An information device comprising:

a flexible display unit capable of displaying information having page information in units of pages;

a detection unit configured to detect at least one of a bending direction, an amount of bending, and a duration that the display unit is bent; and

a scroll determination unit configured to determine whether page scrolling has been input based on the detected at least one of the bending direction, the amount of bending, and the duration that the flexible display unit is bent, and for updating the information output on the display unit when it is determined that page scrolling has been input,

wherein it is determined that page scrolling has not been input when the bending direction is opposite a predetermined direction.

20. (new) A method for displaying information on an information device displaying electronic pages on a flexible display unit, the method comprising:

determining page information to be displayed;

displaying the page information on the flexible display unit;

accepting user input;

determining if the user input is a scroll request based on at least one of a bending direction, an amount of bending, and a duration that the flexible display unit is bent;

if the user input is a scroll request, determining new page information to be displayed based on the scroll request; and

displaying the new page information on the flexible display unit,

wherein if the bending direction is opposite a predetermined direction, it is determined that the user input is not a scroll request.
